Description: A project aiming at exchanging experiences between archeology professionals, young students and the public - as well as protecting the cultural heritage of "Torre Alemanna". Activities include: setting up and running a school camp of excavation and restoration, with students from around Europe; creating a website and online forum for exchanging information; running a games laboratory; producing books and CD-Roms in different languages; and organising a travelling exhibition towards the end of the project.

Objectives: To convey to the public, especially young students, the importance of local cultural goods and heritage; to train young students in excavation and restoration; to protect the cultural and artistic monuments in the territory; to diffuse the information and to create new jobs in the field of archeology and restoration.

25. - Este Court Archive - ECA

1.1.a musée (technologie numérique)

Project leader:	MUSEO DEL CASTELLO ESTENSE (Italy)
Coorganisers:	-CINECA (IT) -GEMALDEGALERIE ALTE MEISTER (DE) -MUSEE DU LOUVRE (FR) -NARODNI GALERIE (CZ)

Description: The creation of a joint on-line catalogue of all works (paintings, sculptures, coins, books, etc) originating from the Este family court in Ferrara - by compiling all of the works currently in collections at the Louvre (France), the Gemaldegalerie (Germany), the Narodnik Galerie (Czech Republic) and the Hermitage (Russia). A standardised method will be established for all partners to catalogue all the items, and a user-friendly software application will be developed on the Web.

Objectives: To create a joint on-line catalogue on the web, which is user-friendly, publicly accessible and multi-lingual - and thus makes Europe's cultural heritage accessible to a wider audience. It is also hoped that, in the long term, the software applications and techniques developed could help other museums to create their own computer-based catalogues.
