installations, giving performances and performing other activities in order to reshape public space and make it more friendly for its potential users, in the same time attracting and developing new audience.

We hope that thanks to the funds obtained we will be able to cover the costs of stay and transportation within the project as well as to finance the materials needed for the work and give the project wide coverage in the local and national media.

Our main goal is to bring closer to the Polish audience the richness of European modern art and design as well as presenting regional craft from UE countries reflected more and more often in the works of contemporary artists. Therefore, we are looking forward to be able to cooperate with the representatives of the world of craft, design and art from the European Union strengthening regional identity, getting to know each other better, working together and learning one from the other. We believe that our common heritage will work as a platform in order to both enrich our cultural diversity and will lead to establishing common cultural productions in the future. We hope that our project will capture media wide attention and will be repeated annually.
