

NUMBER OF PROJECTS BY ACTIONS (2014 - 2017)

TOTAL BUDGET PER YEAR AND PER ACTION

CREATIVE EUROPE CULTURE 2014-2017

The Creative Europe Culture sub-programme is achieving its objectives after 4 years in operation:

- 1500 organisations are collaborating via more than 280 small or larger-scale cooperation projects which cover all culture and artistic creation sectors
- more than 4000 professionals are connected through 33 pan-European networks
- 23 new platforms have been created to accelerate emerging artist's careers and bring the public closer to them
- more than 200 publishers have been supported to translate and promote almost 1400 European books

The 4 funding mechanisms, Cooperation Projects, Platforms, Networks and Literary Translation Projects, are complementary and are producing benefits for both professionals and the general public:

- thousands of artists have so far been or are currently being supported and thousands of cultural experts and workers have so far participated or are currently participating in projects
- it is estimated that well over 100 million people across Europe have so far been or are currently involved in projects or are watching these projects as an audience

With a budget of €202.7 million, the sub-programme has mobilised hundreds of millions either via direct co-financing, sponsorship or as a 'leverage effect' on different cultural sectors.

The statistics below provide a basic overview of the first years of the sub-programme:

- the projects are in line with the programme's priorities: audience development, capacity building and the mobility of artists
- performing arts account for the biggest share of the funded projects, followed by visual arts and then by cultural heritage
- emphasis is being placed on emerging artists, in particular through the innovative platform scheme and social inclusion, notably supporting the refugee population in Europe
